MOHAMMED MINHAJ MAHMOOD

Email: minhajmuhammad229@gmail.com | **Phone:** +91 80509 09536 | **LinkedIn:** linkedin.com/in/mohammed-minhaj-mahmood-76037b310/

PROFESSIONAL SUMMARY

Data Systems & Automation Specialist with a strong background in automated data validation pipelines, enterprise software testing, and reliable ETL workflow development. Proven track record in building Python-based inspection and data validation scripts for health and agricultural research initiatives (Public Health Foundation of India), as well as structured feature QA for enterprise AI platforms (Ejada Labs). Focused on ensuring data fidelity, regression stability, and operational automation across expanding industrial and technical ecosystems in the GCC.

CORE COMPETENCIES & TECHNICAL SKILLS

Languages & Tools: Python (pandas, NumPy, openpyxl, feedparser, requests), SQL (PostgreSQL, SQLite), Git, Bash
Data Engineering & Automation: ETL Pipeline Design, Data Quality Auditing, Validation Frameworks, Prefect Orchestration
Quality Assurance: Regression Testing, Edge-case Simulation, Schema Ingestion Validation, Test Scenario Design
Domains: AgriTech & Biofuels Data, Enterprise AI Platforms, Public Health & Environmental Research, Operational Reporting

PROFESSIONAL EXPERIENCE

Public Health Foundation of India (PHFI) — Research Data Analyst & Automation Assistant

Data Validation & Pipeline Engineering

• Architected automated Python validation scripts to detect missing variables, format anomalies, and structural inconsistencies across remote field research and environmental health reports.

• Ensured zero bad-record propagation into analytical datastores, standardizing multi-source sensor and survey datasets.

Ejada Labs — Software QA & Feature Tester

Enterprise AI & Platform QA (Sanad AI)

• Conducted rigorous feature testing, structured QA, and end-to-end regression testing on the Sanad AI platform to guarantee model stability.

• Authored detailed edge-case test suites validating data ingestion pipelines, preventing data drift and interface regressions.

Independent Client Engagements — Data Workflow Specialist

Operational Automation & Custom ETL

• Engineered automated data cleaning scripts and scheduled ETL workflows for enterprise clients, eliminating manual spreadsheet bottlenecks.

• Built robust schema-mapping tools transforming unstructured partner outputs into clean operational reports.

EDUCATION

Bachelor of Engineering / Computer Science & Data Science

Specialization in Software Systems, Algorithms, and Data Management
